EDUCATION -----

## University of Waterloo (Waterloo, CA)

2015 - 2020

Civil Engineering, Honours BASc

- Computer Science Courses: Algorithms & Data Structures, Numerical Methods, Optimization, Statistics
  - Systems Programming & Concurrency: Implemented synchronization patterns and asynchronous & event-driven I/O using C
  - Databases & Software Design: Designed and built 3-tier web applications using Ruby on Rails; Gained exposure with SOLID principles; Adopted TDD & unit testing through RSpec and Git for version control; Designed database schemas with UML class diagrams and wrote queries using SQL
  - Pattern Recognition & AI: Applied clustering, classifications, parametric & nonparametric learnings, and discriminant functions through MATLAB; Utilized Python & TensorFlow to create AI models

### University of Leeds (Leeds, UK)

January - June 2019

• **Computational Fluid Dynamics Project:** Investigated the effects of fluid flow and heat transfer in microchannels through the finite volume method

#### SAMPLE PROJECTS -----

- Traffic: a CNN model that I built to predict German traffic signs
- Hangman: a word game that allows users to guess a random word based on a given number of guesses
- Matrix Stiffness: a demo of the popular structural analysis method for solving indeterminate structural members, often seen in aerospace engineering
- Spell Manager: final project for my software design course that allows users to CRUD and filter spells & spell books (in progress)

#### EXPERIENCE

# Research Assistant – Hydrologic Model Development & Analysis Water Institute, Waterloo

April - August 2018

- Co-developed the subroutines of the hydrologic model MESH in structured programming style by reading
  Fortran documentation and research papers
- Tested the program subroutines with shell scripts and debugged compile- & run-time errors
- Conducted statistical and time series analysis of hydrologic data by manipulating data and utilizing regression and dynamic time warping techniques through R's libraries
- Adopted concurrent versioning system in collaboration with the research group in Saskatchewan
- Presented research summary of the interflow and infiltration algorithms at the 2018 Canadian Geophysical Union Conference (CGU) in Niagara Falls

#### **Technical Intern**

### Simpson Gumpertz & Heger, San Francisco

**September – December 2019** 

- Developed and presented visual contents including decision trees and flowcharts based on engineering documentation and specifications
- Identified building enclosure design issues and revised based on building physics principles including heat flow, air ventilation, and water infiltration
- Displayed effective communication and organizational abilities by assisting with 20+ technical reports and verifying submittals based on shop drawings and datasheets

#### **Project Coordinator**

#### EllisDon - Ottawa Light Rail Transit Project, Ottawa

September – December 2017

- Performed scheduling through Gantt charts and the critical path method for minimizing project delays
- Conducted quantity take-offs (estimating) and verified product contracts for cost control, successfully reducing the project closure phase
- Utilized Oracle's Primavera software for tracking project progress and responding to inquiries

#### **Structural Modelling Intern**

#### HongRun Group Co. Ltd, Shanghai

January - April 2017

- Demonstrated quantitative abilities by calculating load combinations for model input and evaluating the model output with respect to the building code
- Drafted structural details per specifications through AutoCAD

# ACHIEVEMENTS & LEADERSHIP ------

- Hult Prize Waterloo Finalist Craft Collective: Selected as one of the top 8 finalist teams to pitch youth unemployment solutions out of 30+ teams
  - Reference: https://uwaterloo.ca/conrad-school-entrepreneurship-business/news/studententrepreneurs-pitch-solutions-youth-unemployment
- Podcast Team @ Engineers Without Borders UW Chapter: Co-produced sustainability-themed podcasts from a systems-thinking perspective, aiming to increase awareness on campus
  - Reference: https://anchor.fm/uwaterlooewb/
- **UW Varsity Athlete Tennis**: Selected as one of the 9 roster players out of 50+ players in the varsity tryout
  - Reference: https://athletics.uwaterloo.ca/sports/mens-tennis/roster/2018-19
- Teaching:
  - Certified Tennis Canada Instructor
  - Stepping Stones China English Teacher: teaching 15+ migrant children in China
  - Daedalos Academy Camp Assistant: tutoring elementary-school children LEGO robotics
- Campus Sustainability Initiative: Campus Compost Operator
- Recipient of the UW President's Scholarship

- Languages: C++, C, Python, R, MATLAB, SQL, HTML, CSS, JavaScript, Ruby
- Frameworks and Libraries: Rails, TensorFlow
- Tools: Git, Valgrind, RSpec
